Career Objective

Detail-oriented and analytical Computer Engineering student seeking a Data Analyst position to leverage strong skills in SQL, Python, data visualization, and statistical analysis. Eager to transform complex datasets into actionable insights, support data-driven decision-making, and contribute to operational efficiency within a dynamic financial services environment.

Technical Skills

Frontend Development: React , HTML, CSS, JavaScript

Backend Development: Node.js , Python , REST API Development

Databases: SQL , MongoDB

Libraries/Frameworks: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn

Tools: Git, GitHub, Unity, Power BI, Jupyter Notebook, Google Colab, MS Excel

Platforms: Windows, Ubuntu (WSL)

Education

Education Level	Institution	Year & Score
B.E. (Computer Engineering)	Wadia College of Engineering, Pune	2022–2026 CGPA: 8.5
LMDP Diploma	Livestock Management and Dairy Production College, Alkuti	2022 74.04%
HSC (12 th)	Shree Ganesh Junior College, Korhale	2020 74.15%
SSC (10 th)	New English School, Korhale	2018 84.20%

Internship Experience

Virtual Reality Intern – FireBirdVR

June 2025 – Dec 2025

- Working on immersive VR learning experiences using Unity and XR Toolkit.
- Built interactive simulations for nanoparticle behavior and scientific visualization.

Projects

Product Sales Analytics Dashboard | *Power BI, Data Visualization, DAX*

- Designed an interactive Power BI dashboard analyzing 40K+ sales records to track KPIs such as total sales, profit, delivered orders, and refund trends.
- Identified top-performing products and time-based sales patterns using visual analytics.
- Implemented slicers and dynamic filtering to enable user-driven business insights.

Restaurant Demand Prediction | *Python, Machine Learning, Regression*

- Built regression and time-series models to predict food demand based on historical and seasonal trends.
- Improved demand forecasting accuracy to support better inventory planning.

SmartExpense – AI-Based Expense Tracker | *React, Node.js, Express, MongoDB*

- Developed a secure full-stack expense tracker using React and Node.js with JWT authentication.
- Designed RESTful APIs with intelligent expense categorization and filtering.
- Built dynamic financial dashboards for real-time spending insights.

Certifications

- **Data Analyst 101 Certificate:** Completed foundational training in data analysis, reporting, and visualization.
- **Unity Essentials Certificate:** Completed Unity Essentials pathway covering game engine basics, interface, and asset management.
